

Create Your Store Pages and Menus

Step 1 – your store’s legal pages

In the footer of your store you should have the required legal pages

- Terms & Conditions
- Privacy
- Refunds & Returns

I have provided you with some templates for these pages, but please be sure to edit these as per the instructions on the video.

Step 2 – pages that go in your main (top) navigation bar

I recommend the following:

- FAQ’s
- Get Help (this is your ‘contact us’ page)

All Shopify themes have a page template called ‘page.contact’, which automatically inserts a contact form on the page. This is the template you should choose when creating the ‘Get Help’ page.

Note that as well as providing legal page templates, I have also provided some sample FAQ’s for you.

As well as the above pages, you should also create a page called:

‘Delivery Information’, or ‘Shipping and Delivery’

After you have created all your pages, add them to the menus by clicking on ‘Navigation’

You will have a Footer menu, a Main menu and possibly a Sidebar menu (depending on whether or not your theme has a sidebar)

Select the menu you want to add pages to, and add each page one at a time. Save your menus when you have added all the pages.

As always, do not rely ONLY on the PDF’s. The videos are much more detailed and must be watched in order to gain a full understanding of the process.
